

Route **Argalasti - Lefokastro / Kalamos**
Checked by **David Lewis**
Date **4 October 2023**
Condition **Difficult in places, passable with caution**

Description of the walk

Argalasti - Lefokastro and Kalamos

Condition of the walk

Photo 10 is the start of the section of path leading from Argalasti to Lefokastro. This section of path was blocked by cut tree and shrub branches. The path was however still passable by going into the adjoining field.

This path appears to have been deliberately blocked, though it is not clear why, though latter sections of the path were very uneven due to stones and parts of the path itself being washed away.

Photo 11 is the start of the path leading to Kalamos (approximately 200m along the start of the dirt track. This section has been blocked by a landslide. It is covered in brambles and other vegetation- it looks as though someone has tried to cut a small path through and would be potentially passable if you are wearing thick long trousers.
