

**Route** Light house Agia Kyriaki

**Checked by** Dimitrios Pettas

**Date** November 17, 2023

**Condition** Difficult in places, passable with caution

### **Description of the walk**

The route connects to the Trikeri Agia Kyriaki kalderimi with asphalt and dirt road

### **Condition of the walk**

The dirt road connecting the tarmac to the lighthouse has been repaired after the storms (image 1) but is paved with gravel and loose stones that need attention.

The path has some stones along the way that can easily be avoided (picture 2)

In places the vegetation is dense, so long pants are recommended (picture 3, 4)

Two points require attention because the path is narrow from the vegetation and next to it are the rocks of the coastline

At the point where the dirt road from Mylos meets the dirt road from the parking lot, there is a hill of stones, which can be passed relatively easily
