

<b>Route</b>	<b>Metochi - Horto - short (lower) route</b>
<b>Checked by</b>	<b>Mandi Mathews &amp; Janet Tindall</b>
<b>Date</b>	<b>19 September 2023</b>
<b>Condition</b>	<b>Difficult in places, passable with caution</b>

### **Description of the walk**

*Leaving from the vrisi in Metochi we go down to the right on a concrete slope and along a small concrete path. At the end of that path we turn right down the steep hill, then sharp left up a short concrete slope and along until we meet the farm track (we can turn right where it is signed, to go down to the old washing area, however this path is overgrown and there are a few trees down and the path is very uneven, so although it is possible it is difficult and therefore easier to follow the farm track). We follow the farm track turning right at the end and follow it down as it zig-zags and passes the church, continuing until we come to another junction (pictures 1 & 2) where we turn right and follow this track all the way down to Horto.*

### **Condition of the walk**

At several points along the walk there are gulleys which have been gauged out by the water, but some repairs have been carried out and the path is now passable with care (picture 3).
